

**PSGR
Krishnammal College for Women**

DEPARTMENT OF BCA

CHOICE BASED CREDIT SYSTEM (CBCS) & LEARNING OUTCOMES BASED CURRICULAR FRAMEWORK (LOCF)

BACHELOR OF COMPUTER APPLICATIONS

2025-2028 Batch

PROGRAMME LEARNING OUTCOMES (PLO's)- UG

After completion of the programme, the student will be able to

PLO1: Design and Develop computer based systems with strong foundation in fundamentals and clarity on both conceptual and application oriented skills of various domains.

PLO2: Spark the reflective thinking process in various areas like information computing sectors, teaching and innovative researches.

PLO3: Work independently on a substantial software projects and as an effective team member.

PLO4: Inculcate the self directed learning in emerging technologies to upgrade them.

PLO5: Engaged in lifelong learning to equip them to the changing environment and be prepared to take up mastering programmes.

PROGRAMME SPECIFIC OUTCOMES (PSO's)

PSO1: The students will obtain an attitude to understand the societal issues and apply the acquired programming skills to develop system-based application.

PSO2: Students are capable to comprehend the technological advancements in the usage of modern tools to satisfy industry needs.

PSO3: A strong foundation to pursue higher education in the fields of teaching and research.

COURSE CODE	COURSE TITLE	CATEGORY	L	T	P	CREDIT
CY25C01	PROGRAMMING IN C	THEORY	58	2	-	3

Preamble

- This course introduces fundamental programming constructs in C.
- It covers the concepts such as arrays, functions, structures, pointers and file handling.
- It provides comprehensive coverage on industry 4.0.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recall the programming constructs and structure of C programming and Industry 4.0 technologies	K1
CLO2	Understand the purpose of arrays, strings, structures, pointers and files to solve problems	K2
CLO3	Apply functions to solve problems using procedure oriented approach	K3
CLO4	Analyze the problems and solve it by applying appropriate logic	K4

Mapping with Programme Learning Outcomes

CLOs	PLO1	PLO2	PLO3	PLO4	PLO5
CLO1	S	S	S	S	S
CLO2	S	S	M	S	M
CLO3	S	S	S	S	S
CLO4	S	S	S	S	S

S- Strong; M-Medium;

PROGRAMMING IN C - CY25C01

58 Hours

Unit I

12 Hrs

Overview of C - Constants, Variables and Data types - Operators and Expressions - Managing Input and Output Operations - **Sulba Sutras-Decision Making and Branching - Decision Making and Looping.**

Unit II

11 Hrs

Shloka Arrays: One-Dimensional - Two Dimensional - Multidimensional Arrays-Character Arrays and Strings: Declaring and Initializing String Variables - Reading Strings from Terminal - Writing Strings to Screen - String Handling Functions.

Unit III

12 Hrs

Chandas -User-Defined Functions: Need - Return Values and Types - Function Calls – Function declaration - Category of Functions - No Arguments and No Return Values - Arguments but No Return Values - Arguments with Return Values - Recursion - Scope Visibility and Life time of Variables **Structures and Unions** - Definition: Structure Initialization - Comparison of Structure Variables - Arrays of Structures - Arrays within Structures - Unions.

Unit IV

12 Hrs

Pointers: Understanding Pointers - Accessing the Address of a Variable - Declaring and Initializing

Pointers - Accessing a Variable through its Pointers - **Pointers and Arrays**. File Management in C: Defining and Opening a File - Closing File - **I/O Operations on Files** - Dynamic Memory allocation MALLOC, CALLOC, REALLOC.

Unit V

11 Hrs

Introduction to Industry 4.0 - Need - Reasons for Adopting Industry 4.0 - Definition - Goals and Design Principles - **Technologies of Industry 4.0** - Skills required for Industry 4.0 - Advancements in Industry **Impact of Industry 4.0 on Society, Business, Government and People - Introduction to 5.0.**

PEDAGOGY

- Lectures, Group discussions, Demonstrations

COURSE DESIGNER

1. Dr. Sabitha Banu A

COURSE CODE	COURSE TITLE	CATEGORY	L	T	P	CREDIT
PP22C02	COMPUTATIONAL AND ALGORITHMIC THINKING FOR PROBLEM SOLVING	Theory	45	-	-	3

Preamble

- This course aims to kindle the young minds to think like a computer scientist, with the idea that Computing and computers will enable the spread of computational thinking.
- Computational thinking is thinking recursively, reformulating a seemingly difficult problem into one which we know how to solve and taking an approach to solving problems, designing systems, and understanding human behavior that draws on concepts fundamental to computer science.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Define the basic principles of Logical reasoning, Problem Solving in Computational Thinking.	K1
CLO2	Understand the applications of propositional logic, Problem representation and techniques.	K1
CLO3	Apply algorithmic thinking to problem solving using tools Flowgorithm, Scratch, iPython.	K2
CLO4	Apply and analyze to solve domain specific problems using computational thinking concepts.	K4

Mapping with Programme Learning Outcomes

COMPUTATIONAL AND ALGORITHMIC THINKING FOR PROBLEM SOLVING -

PP22C02

45 Hours

Syllabus

Unit I

7 Hrs

Basics: Introduction to Computational Thinking- Data Logic – History of Computational Thinking-Applications of Computational Thinking.

Unit II

8 Hrs

Data- Information and Data - Data Encoding - Logic - Boolean logic - Applications of simple Propositional Logic. Tool: Flowgorithm and Scratch.

Unit III**10 Hrs**

Problem Solving and Algorithmic Thinking: Problem definition- Logical reasoning- Problem decomposition- Abstraction- Problem representation via Algorithmic thinking: Name binding- Selection- Repetition and Control Abstraction- Simple Algorithms – Comparison of performance of Algorithms.

Unit IV**8 Hrs**

Activities in Class: Sudoku-Towers of Hanoi- Graph Coloring-Geographical Map reading-Poem reading-Novel reading- Data analysis on news.

Unit V**12 Hrs**

Problem Solving Techniques- Factoring and Recursion Techniques- Greedy Techniques-Divide and Conquer- Search and Sort Algorithms- Text Processing and Pattern matching. Tool: iPython

AP24C03	OPERATING SYSTEMS FUNDAMENTALS – LINUX	Theory	58	2	-	3

Preamble

- This subject is designed to provide the students with a thorough discussion of the fundamentals of operating system.
- To explore the various memory management scheme and to perform administrative task on LINUX servers.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLOs Number	CLO Statement	Knowledge Level
CLO1	Recall the basic concepts with functions of operating systems and Linux system.	K1
CLO2	Understand the operating systems objectives and functionality along with system programs and system calls.	K2
CLO3	Compare and contrast various memory management schemes.	K2
CLO4	Demonstrate deadlock, prevention and avoidance algorithms, storage management, various scheduling algorithms and shell programming.	K3

OPERATING SYSTEMS FUNDAMENTALS – LINUX - AP24C03

58 Hours

SYLLABUS

UNIT I

12 Hrs

Introduction: What is operating systems do - **Computer System Architecture – Operating System Operations**. Process Management: **Process Concept** - Process Scheduling - Interprocess communication.

UNIT II

12 Hrs

Process Scheduling: **Basic Concepts- Preemptive and Nonpreemptive Scheduling** - Scheduling Algorithms (FCFS, SJF & Round Robin only). Synchronization: **Back ground**-The Critical Section Problem-Peterson's Solution- Semaphores- Deadlock: **Deadlock Characterization** - Methods Handling Deadlocks - Recovery from Deadlock.

UNIT III

11 Hrs

Memory Management Strategies: **Background-Contiguous Memory Allocation**-Paging. Virtual Memory Management: Demand Paging - Page Replacement - Basic Page Replacement, **FIFO Page Replacement**, Optimal Page Replacement.

UNIT IV**11 Hrs**

What Linux Is – Becoming a Linux Power User : About Shells and Terminal Windows-Choosing your shell - **Running Commands** - **Recalling Commands Using Command History** - Connecting and Expanding Commands -Using Shell Variables.

UNIT V**12 Hrs**

Moving Around the File system : Using Basic File system Commands - Using Meta characters and Operators - **Listing Files and Directories** - Moving, Copying, and Removing Files.

COURSE CODE	COURSE TITLE	CATEGORY	L	T	P	CREDIT
AP24CP1	PROGRAMMING IN C LAB	Practical	-	-	45	2

Preamble

- To provide the hands on experience on C Programming and improve the practical skill set.
- The learner will be able to develop the logic for the given problem, recognize and understand the syntax and construction of C code.
- To know the steps involved in compiling, linking and debugging C code, feel more confident about writing the C functions, write some complex programs.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Identify the basic terminologies of c programming by using different data types, decision structures, loops and functions.	K1
CLO2	Understand the dynamics of memory allocation by the use of pointers and files.	K2
CLO3	Understand the concepts of Structures and Unions.	K2
CLO4	Design and develop the simple business application.	K3

PYTHON PROGRAMMING – IN24C04 (73 HRS)

UNIT I

(14 Hrs)

Introduction: Why do people use python- Python a scripting language- Users of Python- Need of Python- Python's Technical Strengths- How Python runs programs: Introducing the Python Interpreter- Program Execution-Execution Model Variation: Python Implementation Alternatives.

UNIT II

(15 Hrs)

Types & Operations: Numbers Types: Numeric type basics, Numbers in action, Other numeric types- Strings Fundamentals: String Basics, String Literals, Strings in action, String Methods – Lists – Panini's Ashtadhyayi, Anitya - Dictionaries-Tuples and Immutable Truths- Sutrass-Files.

UNIT III

(15 Hrs)

Control Flow: Statements& Syntax: Assignment-Expressions & Print- if tests-While& for loops. Functions: Function Basics: Why use functions- Coding Functions- Definition & Calls. Scopes: Python basics-Global Statement-Scopes Nested functions -Arguments: Arguments passing Basics- Special Arguments Matching Modes.

UNIT IV**(14 Hrs)**

Files and Exception handling: Files -Text Files, File Objects, File Built-in Methods, File Built-in Attributes, Standard Files, Reading and writing, Format operator, Filenames and Paths, Pipes. Exceptions: Built-in Exceptions, Handling Exceptions, Exception with Arguments- Nyaya Logic- User-defined Exceptions.

UNIT V**(15 Hrs)**

Modules and Packages: Modules - Modules and Files, Namespaces, Importing Modules, Importing Module Attributes, Module Built-in Functions. Python packages- Simple programs using the built-in functions of packages matplotlib, numpy, pandas. GUI Programming - Tkinter introduction, Buttons and callbacks, Canvas widgets, Coordinate sequences, Tk Widgets, Menus and Callables.

DIGITAL COMPUTER FUNDAMENTALS – AP24C05 (58 HRS)

UNIT I: (11 Hrs)

Introduction – Number System – Floating Point Representation of Numbers – Arithmetic Operations – 1's and 2's Complement subtraction – 9's complement subtraction – 10's Complement subtraction – Binary Coded Decimal.

UNIT II: (12 Hrs)

Boolean Algebra and Minimization Techniques: Introduction – Development of Boolean Algebra – Boolean Logic Operations – Basic Law of Boolean Algebra – Demorgans Theorems - Sum of products and Product of Sums - Karnaugh maps.

Logic Gates: Introduction – Logic Gates- OR,AND, NOT ,NAND,NOR,Universal Gates- Exclusive-OR (Ex-OR).

UNIT III:**(11 Hrs)**

Arithmetic Circuits: Introduction – Procedure for the Design of Combinational Circuits – Half Adder – Full Adder – K -Map simplification – Half Subtractor – Full Subtractor - 4 bit Parallel binary Adder/Subtractor.

UNIT IV:**(12 Hrs)**

Combinational Circuits: Introduction – Multiplexers – Basic Four input Multiplexer- IC 74151 8 to 1 multiplexer– Demultiplexers : 1 to 4 , 1 to 8 demultiplexers– Decoders – basic binary decoder 3 to 8 decoder– Encoders – Octal to Binary Encoder.

UNIT V:**(12 Hrs)**

Flip Flops: Introduction – Latches – Set-Reset (S-R) latch – NOR Based S-R Latch – NAND Based S-R Latch – State Diagram and Characteristic Equation of S-R Latch – Types of flip flops – S-R flip flop – D flip flop – J K flip flop - T flip-flop.

Registers: Introduction – Shift Registers – Serial-in-Serial-out Shift register – Serial-in- Parallel-out Shift Register – Parallel-in-serial-out Shift Register – Parallel-in-Parallel-out Shift register.

58 Hours

Syllabus

UNIT I:

11 Hours

Introduction And Physical Layer: Networks-**Networks Types**-Protocol Layering-TCP/IP Protocol suite:Layered Architecture-Layers in the TCP/IP Protocol Suite-Encapsulation and Decapsulation-Addressing-**Multiplexing and Demultiplexing**- The OSI Model -Physical layer: Performance.

UNIT II:

11 Hours

Digital Transmission: **Transmission Modes**. Switching: Introduction-Circuit Switched Networks- Packet Switching: Datagram Networks.

Data-Link Layer: Introduction-**Link Layer Addressing - Three Types of addresses**- Address Resolution Protocol (ARP). Wired LANS: Ethernet -Ethernet Protocol-**Standard Ethernet**.

Wireless LANS: Introduction-IEEE 802.11-Architecture, Bluetooth - Architecture.

UNIT III:**12 Hours**

Network Layers: **Network Layer Services-Packet Switching-** Network Layer Performance- IPv4 Addresses: Address Space-Classful Addressing-Classless Addressing- **Forwarding of IP Packets-** Network Layer Protocols: Internet Protocol-Datagram Format- Security of IPv4 Datagrams, ICMP V4.

UNIT IV:**12 Hours**

Transport Layer: **Introduction to Transport Layer. Simple Protocol-Stop-and-Wait Protocol-Transport Layer Protocols: Introduction** -User Datagram Protocol- Transmission Control Protocol- TCP Services-TCP Features-Segment-SCTP - SCTP Services - SCTP Features.

UNIT V:**12 Hours**

Application Layer: World Wide Web and HTTP- FTP-Telnet -Secure Shell (SSH) - Network Management: Introduction - SNMP-Managers and Agents - Management Components.

COURSE CODE	COURSE TITLE	CATEGORY	L	T	P	CREDIT
AP23C07	DATA STRUCTURES USING PYTHON	Theory	58	2	-	3

Preamble

- To get familiarize knowledge with designing an algorithm using data structures in Python.
- To articulate the essential components of data structures like Stack, Queue, List, Searching, Sorting, Merging and Trees.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLOs Number	CLO Statement	Knowledge Level
CLO1	Identify the appropriate and optimal data structure for a specified application.	K1
CLO2	Understand the concept of Data structures and its applications	K2
CLO3	Illustrate the use of different linear and non-linear data structures and their applications.	K3
CLO4	Design and implementation of data structure.	K4

Mapping with Programme Learning Outcomes

CLO's	PLO1	PLO2	PLO3	PLO4	PLO5

DATA STRUCTURES USING PYTHON - AP23C07

58 Hours

Syllabus

UNIT I:

12 Hrs

Data Structures: Introduction – What is Data Structure? Why do we need Data Structure? – Different types of Data Structures – How to select a Data Structure? – How are Data Structures Implemented? – Real life scenarios for Data Structures – **Difference between Data Structures and Database Management Systems.**

Abstract Data Types and Analysis: Introduction - Complexity – Time Complexity and Space Complexity - Asymptotic Notation: - Big O – Big Omega – Big Theta – Small O – Small Omega – Recursion: How Recursion works? Inefficient Recursion – Analysis of Recursive functions – **Applications of Recursion.**

UNIT II:

12 Hrs

Linear Data Structures: Arrays – Introduction - Declaration of Arrays – Implementation: Insertion – Deletion – Merging – Some more operations – Complexity Analysis – Applications – Python Sequences.

Stack : Introduction – Working: Push Operation, Pop Operation, Top Operation – Implementation of Stack using Pointers – Applications of Stacks – Infix to Postfix Conversion – Evaluation of Prefix Expression.

Queues: Single Ended Queues – Enqueue Operation – Dequeue Operation – Front Operation – Implementation of Single Ended Queues using lists – Double Ended Queues – Push Front operation – Push Back Operation – Pop Front Operation – Pop Back Operation – Front Operation– Rear Operation – **Applications of Queues.**

UNIT III:

11 Hrs

Linked Lists: Introduction to Linked List – **Singly Linked List: Insert Node Operations – Delete Node Operations – Value At Operation** – Implementation of Singly Linked List – **Doubly Linked List:** Insert Node Operations – Delete Node Operations – Value At Operation – Implementation of Doubly Linked List – **Circular Linked Lists:** Insert and Delete Node Operation – Applications of Linked List.

UNIT IV:

12 Hrs

Trees: Introduction – Definitions – Binary Trees: Types of Binary Trees – **Implementation of Binary Trees: Pointer Based Implementation** – Array based Implementation – Linked List based Implementation – Traversal: In Order Traversal – Pre Order Traversal – Post Order Traversal – Level Ordered Traversal – Basic Operations: Inserting and Deleting a Node – **Applications of Trees.**

Binary Search Trees: Introduction – Operation: Search Value – Insert a Node – Delete a Node – Implementation of Binary Trees.

UNIT V:

11 Hrs

Graphs: Introduction, Components of a Graph, Graph representation, **Types of Graphs.**

Sorting: Introduction – Importance of Sorting Algorithm – Exchange Sort: Bubble Sort – Selection Sort: Straight Selection Sort – **Heap Sort – Insertion Sort: Simple Insertion Sort** – ShellSort – Divide and Conquer: Merge Sort – Quick Sort.

Searching: Introduction – Linear Search: Working – Implementation – Binary Search: Working – Implementation – Tree-Based Search – Hashing

COURSE CODE	COURSE TITLE	CATEGORY	L	T	P	CREDIT
CS23SBGP	Gen-AI	Practical	44	1	-	3

Preamble

- The objective of this course is to understand the breadth and depth of Generative Artificial Intelligence (Gen AI) and to impart knowledge on its ethical implications, practical applications, and emerging trends.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLOs Number	CLO Statement	Knowledge Level
CLO1	Understand the fundamental concepts and ethical considerations of Generative AI.	K2
CLO2	Apply AI principles in practical settings using basic AI tools and platforms	K3
CLO3	Develop advanced skills in specialized AI applications such as text analysis, natural language processing, and image recognition.	K3
CLO4	Explore emerging trends in AI, integrating advanced AI tools into diverse professional practices.	K4

Mapping with Programme Learning Outcomes

Gen-AI - CS23SBGP

44 Hours

Syllabus

UNIT I: Introduction to Gen AI

9 Hrs

Understanding Gen AI: Definition and scope of Gen AI - Overview of its applications in various fields - Introduction to essential skills needed for Gen AI. Ethical Considerations: Discussion on ethical guidelines and responsible use of AI - Understanding the impact of AI on society and individuals.

Hands-on Activity: Exploring AI Tools

- Working with appropriate content creation Gen-AI tools to engage with ChatGPT to explore various subjects, simulate interviews, or create imaginative written content.
- Working with appropriate writing and rephrasing Gen-AI tools to drafting essays on designated topics and refining the content with improved clarity, coherence, and correctness.

UNIT II: Basic AI Concepts

8 Hrs

Introduction to AI: Basic concepts and terminology of artificial intelligence - Examples of AI in everyday life - Real-world examples of AI applications in different domains. Machine Learning Basics: Understanding the principles of machine learning - Overview of supervised and unsupervised learning.

Hands-on Activity: Simple AI Projects

- Working with appropriate educational content creation Gen-AI tools to generate quizzes and flashcards based on classroom material.
- Working with appropriate language learning Gen-AI tools to practice and enhance language skills through interactive exercises and games across multiple languages.

UNIT III: AI in Practice

9 Hrs

Text Analysis and Natural Language Processing (NLP): Introduction to NLP concepts and techniques - Hands-on exercises analyzing text data and extracting insights. Image Recognition and Processing: Basics of image recognition algorithms and techniques - AI Tools for Text and Image Processing.

Hands-on Activity: Text and Image Projects

- Working with appropriate image processing Gen-AI tools to experiment with AI-generated images.
- Working with appropriate object recognition Gen-AI tools to identify various objects such as text, images, products, plants, animals, artworks, barcodes, and QR codes.

UNIT IV: AI for Productivity and Creativity

9 Hrs

AI-enhanced Productivity and creativity Tools: Overview of productivity and creativity tools enhanced with AI capabilities - Tips for integrating AI into daily tasks and workflows. AI and Jobs: Exploring how AI impacts jobs and industries - Discussion on opportunities and challenges - Exploration of AI-powered creative tools and applications.

Hands-on Activity: Productivity and Creativity

- Working with appropriate content creation Gen-AI tools to generate interactive videos / blog posts / art / drawing / music and storytelling experience.
- Working with appropriate resume generation Gen-AI tools to create professional resumes efficiently.

UNIT V: Future of Gen AI and Final Project

9 Hrs

Emerging Trends in Gen AI - Applications of Generative AI - Ethical and Societal Impact of Gen AI - Future Directions and Challenges - Case Studies in Generative AI.

Hands-on Activity: Trends in Gen AI

- Working with appropriate speech generation Gen-AI tools to customize synthetic speech for virtual assistance across different applications.
- Working with appropriate data analysis Gen-AI tools to perform data analysis, visualization, and predictive modeling tasks.
- Working with appropriate Gen-AI design tools to simplify the creation of visually appealing presentations.
- Working with appropriate website builder Gen-AI tools to develop professional websites with AI assistance.

Pedagogy

- Demonstration of AI Tools, Lectures and Case studies.

Course Designers

- Mrs. S. Ponmalar

Evaluation pattern for Gen-AI

Quiz : 50 Marks (5 quizzes with each 10 marks)

Case study : 25 Marks

Online Exam : 25 Marks (Departments to plan and conduct the exam)

Total : **100 Marks**

Course Code	Course Title	Category	L	T	P	Credit
AP23CP3	DBMS Lab	Practical	-	-	75	4

Preamble

- The lab course provides a way to explore storing and accessing data in database through query languages and PL/SQL programming language.
- It enables to learn database functionality on real time projects.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Understand basic SQL query statements	K2
CLO2	Gain knowledge on primary and foreign key constraints	K2
CLO3	Apply functions and joins on data	K3
CLO4	Demonstrate PL/SQL programming on databases and differentiate Key/value store database from relational database	K4

Mapping with Programme Learning Outcomes

CLOs	PLO 1	PLO2	PLO 3	PLO4	PLO5
CLO1	M	S	S	S	S
CLO2	S	M	S	M	S
CLO3	S	S	M	S	S
CLO4	M	S	S	S	M

S- Strong; M-Medium;

DBMS Lab - AP23CP3

75 Hours

LIST OF PROGRAMS

1. A Case study and formulate the problem statement on a specific project.
2. Draw ER Diagrams with entities, attributes, keys, and relationships between entities, and cardinalities.
3. Draw tables with Normalization
4. Perform Data Definition Language statements (Create, Alter, Drop, Truncate, Rename)
5. Perform Data Manipulation Language statements (Select, Insert, Update, Delete)
6. Perform Transaction Control Language and Data Control Language statements (Grant, Revoke, Commit, Rollback, Savepoint)
7. Perform Data Integrity Constraints Operations (Primary key, Foreign key, Not null, Unique, Check)
8. Perform Aggregate Function and Sorting
9. Implement Joins Operations and Sub Queries
10. Write PL/SQL program to perform Functions and Procedure
11. Create a Registration form using python programming and MySQL database connectivity
12. Create a Login form using python programming and MySQL database connectivity.

Pedagogy

- Demonstration of working environment / Tools / Software / Program

Course Designers

1. Dr. R. Hepziba Ganamalar

JOB ORIENTED COURSE

Title: Amazon Web Services Duration:

60 Hrs

Introduction to Cloud Computing: Overview of Cloud Computing - Types of Cloud Computing - Advantages of Cloud Computing - Characteristics of Cloud Computing - Cloud Computing Terminology - Overview of Amazon Web Services (AWS) AWS Architecture Fundamentals - AWS Global Infrastructure - AWS Regions and Availability Zones - AWS Services Overview - AWS Management Console

Compute Services: - Amazon Elastic Compute Cloud (EC2) - Amazon Elastic Container Service (ECS) - Amazon Elastic Load Balancing (ELB) - Auto Scaling Amazon Lightsail - AWS Lambda **Storage Services:** Amazon Simple Storage Service (S3) - Amazon Elastic Block Storage (EBS) - Amazon Glacier - Amazon Elastic File System (EFS) - Amazon Storage Gateway

Networking Services : Amazon Virtual Private Cloud (VPC) - Amazon Direct Connect - AWS Elastic Load Balancing (ELB) - Amazon Route 53 - Amazon CloudFront - AWS Web Application Firewall (WAF)

Database Services : Amazon Relational DatabaseService (RDS) - Amazon DynamoDB - Amazon Redshift - Amazon Aurora

Security & Identity Services: Amazon Identity and Access Management (IAM) - Amazon Cognito -AWS Certificate Manager -AWS Key Management Service (KMS) - Amazon CloudHSM AWS Shield Management & Developer Tools - AWS Cloud Formation - AWS Cloud Trail - AWS Command Line Interface (CLI) - AWS Systems Manager - AWS CodeCommit - AWS CodeBuild - AWS CodeDeploy - AWS CodePipeline Amazon Kinesis - Amazon EMR - Amazon Athena - Amazon Redshift - Amazon QuickSight

Analytics Services: Application Services: Amazon Simple Queue Service (SQS) - Amazon Simple Notification Service (SNS) - Amazon Simple Workflow Service (SWF) - Amazon API Gateway - Amazon MQ - Amazon AppStream 2.0 **AWS Best Practices:** Cost Optimization - Security - Performance & Scalability - High Availability & Disaster Recovery - Operational Excellence - Automation & Continuous Delivery - Monitoring & Logging.

Title: Cisco Certified Network Associate Duration:

60 Hrs

Network Devices - Routers - Layer 2 and Layer 3 switches - Next-generation firewalls and IPS - Access points - Controllers (Cisco DNA Center and WLC) – Endpoints –Servers – PoE - Network Topologies – Cabling – Connections and it types – Communication Protocols – Casting – Wireless Principles – Frames and Switching – MAC Tables.

Configuring VLAN – CDP and LLDP – LACP – Rapid PVST – Spanning Tree protocols – Port Forward and Block – Wireless Architectures and AP Modes - WLC, access/trunk ports, and LAG - Telnet, SSH, HTTP, HTTPS, console, and TACACS+/RADIUS –IP Connectivity - Components of routing table - Routing protocol metric - Configure

IPv4 and IPv6 static routing - Configure single area OSPFv2 - Concepts of first hop redundancy protocols - NAT using static and pools - NTP operating in a client and server mode – Configure DHCP & DNS - SNMP - Syslog - Configure and verify DHCP client and relay - per-hop behavior (PHB) - Remote access using SSH - TFTP/FTP in the network

Concepts of Security threats, vulnerabilities, exploits, and mitigation - security program elements - Configure and verify device access control using local passwords - security password policies elements - IPsec remote access and site-to-site VPNs - Configure and verify access control lists - Configure and verify Layer 2 security features DHCP snooping, dynamic ARP inspection, and port security - wireless security protocols WPA, WPA2, and WPA3 - Configure and verify WLAN within the GUI using WPA2 PSK

Automation and Programmability - Control plane and Data plane - Northbound and Southbound APIs - REST-based APIs (CRUD, HTTP verbs, and data encoding) - Puppet, Chef, and Ansible - Recognize components of JSON-encoded data

Title: Microsoft Windows Server Administration

Duration: 60 Hours

Manage Microsoft Entra users and groups - Create users and groups -Manage user and group properties - Manage licenses in Microsoft Entra ID -Manage external users -Configure self-service password reset (SSPR) - Manage access to Azure resources -Manage built-in Azure roles -Assign roles at different scopes - Interpret access assignments

Manage Azure subscriptions and governance: Implement and manage Azure Policy -Configure resource locks - Apply and manage tags on resources -Manage resource groups -Manage subscriptions -Manage costs by using alerts, budgets, and Azure Advisor recommendations -Configure management groups -Implement and manage storage (15–20%) -Configure access to storage -Configure Azure Storage firewalls and virtual networks - Create and use shared access signature (SAS) tokens -Configure stored access policies -Manage access keys - Configure identity-based access for Azure Files

Configure and manage storage accounts: Create and configure storage accounts -Configure Azure Storage redundancy -Configure object replication -Configure storage account encryption -Manage data by using Azure Storage Explorer and AzCopy - Configure Azure Files and Azure Blob Storage -Create and configure a file share in Azure Storage -Create and configure a container in Blob – Storage - Configure storage tiers - Configure snapshots and soft delete for Azure Files - Configure blob lifecycle management - Configure blob versioning

Automate deployment of resources by using Azure Resource Manager (ARM) templates or Bicep files: Interpret an Azure Resource Manager template or a Bicep file - Modify an existing Azure Resource Manager template - Modify an existing Bicep file - Deploy resources by using an Azure Resource Manager template or a Bicep file - Export a deployment as an Azure Resource Manager template or convert an Azure Resource Manager template to a Bicep file

Create and configure virtual machines: Create a virtual machine - Configure Azure Disk Encryption - Move a virtual machine to another resource group, subscription, or region - Manage virtual machine sizes - Manage virtual machine disks - Deploy virtual machines to availability zones and availability sets - Deploy and configure an Azure Virtual Machine Scale Sets

Provision and manage containers in the Azure portal: Create and manage an Azure container registry - Provision a container by using Azure Container Instances - Provision a container by using Azure Container Apps - Manage sizing and scaling for containers, including Azure Container Instances and Azure Container Apps

Create and configure Azure App Service

Provision an App Service plan - Configure scaling for an App Service plan - Create an App Service - Configure certificates and Transport Layer Security (TLS) for an App Service - Map an existing custom DNS name to an App Service - Configure backup for an App Service - Configure networking settings for an App Service - Configure deployment slots for an App Service - Implement and manage virtual networking (15–20%)

Configure and manage virtual networks in Azure: Create and configure virtual networks and subnets - Create and configure virtual network peering - Configure public IP addresses - Configure user-defined network routes - Troubleshoot network connectivity

Configure secure access to virtual networks: Create and configure network security groups (NSGs) and application security groups - Evaluate effective security rules in NSGs - Implement Azure Bastion - Configure service endpoints for Azure platform as a service (PaaS) - Configure private endpoints for Azure PaaS

Configure name resolution and load balancing: Configure Azure DNS - Configure an internal or public load balancer - Troubleshoot load balancing - Monitor and maintain Azure resources (10–15%)

Monitor resources in Azure: Interpret metrics in Azure Monitor - Configure log settings in Azure Monitor - Query and analyze logs in Azure Monitor - Set up alert rules, action groups, and alert processing rules in Azure Monitor - Configure and interpret monitoring of virtual machines, storage accounts, and networks by using Azure Monitor Insights - Use Azure Network Watcher and Connection Monitor

Implement backup and recovery: Create a Recovery Services vault - Create an Azure Backup vault - Create and configure a backup policy - Perform backup and restore operations by using Azure Backup - Configure Azure Site Recovery for Azure resources - Perform a failover to a secondary region by using Site Recovery - Configure and interpret reports and alerts for backups

Provision and manage containers in the Azure portal: Create and manage an Azure container registry - Provision a container by using Azure Container Instances - Provision a container by using Azure Container Apps - Manage sizing and scaling for containers, including Azure Container Instances and Azure Container Apps

Create and configure Azure App Service: Provision an App Service plan - Configure scaling for an App Service plan - Create an App Service - Configure certificates and Transport Layer Security (TLS) for an App Service - Map an existing custom DNS name to an App Service - Configure backup for an App Service - Configure networking settings for an App Service - Configure deployment slots for an App Service

Monitor resources in Azure: Interpret metrics in Azure Monitor - Configure log settings in Azure Monitor - Query and analyze logs in Azure Monitor -Set up alert rules, action groups, and alert processing rules in Azure Monitor - Configure and interpret monitoring of virtual machines, storage accounts, and networks by using Azure Monitor Insights -Use Azure Network Watcher and Connection Monitor

Configure and manage virtual networks in Azure: Create and configure virtual networks and subnets - Create and configure virtual network peering -Configure public IP addresses -Configure user-defined network routes -Troubleshoot network connectivity

Implement backup and recovery: Create a Recovery Services vault -Create an Azure Backup vault -Create and configure a backup policy -Perform backup and restore operations by using Azure Backup -Configure Azure Site Recovery for Azure resources -Perform a failover to a secondary region by using Site Recovery - Configure and interpret reports and alerts for backups.

Title : Microsoft Power BI

Duration : 60 Hrs

Introduction to Power BI and Data Analysis : Introduction to Power BI: Overview of Power BI features and capabilities- Importance of data visualization in decision-making - Fundamentals of Data Analysis - Roles in Data Analysis - Tasks of a Data Analyst: Data collection, cleaning, and transformation - Creation of meaningful visualizations and reports - Extracting actionable insights from data. CRISP DM FRAMEWORK. Using Power BI - Building Blocks of Power BI- Understanding Power BI Desktop and Power BI Service - Differentiating between datasets, reports, and dashboards Collaborative aspects of Power BI, including sharing and collaboration.

Data Cleaning and Transformation in Power BI : Data Acquisition in Power BI - Importing data from various sources - Data transformation and cleaning techniques - Connecting Power BI to relational databases - Importing and querying data from SQL Server and other relational databases.

Data Modelling and DAX Functions :Creating Calculated Columns - Understanding the need for calculated columns - Hands-on exercises on creating and using calculated columns - Exploring Time-Based Data - Handling date and time data in Power BI - Time-based calculations and analysis. DAX Calculations in Data Analysis - Guidelines for choosing and implementing DAX calculations - Practical applications and examples. Star Schema Design - Understanding star schema and its advantages - Implementing star schema in Power BI data models.

Data Visualization in Power BI : Writing DAX Formulas - In-depth exploration of DAX syntax and functions - Advanced DAX calculations for complex data analysis. Designing Detailed Reports - Advanced report design techniques - Utilizing features like tooltips and drill-throughs. Statistical Analysis in Power BI- Advanced statistical functions in DAX - Use of advanced visuals for statistical insights. Creating Dashboards in Power BI - Detailed steps for creating interactive dashboards.

Power BI Services vs Desktop : Configuring Row-Level Security - Implementing security measures at the row level - Best practices for securing sensitive data. Setting Up Data Alerts - Configuring alerts for monitoring changes - Troubleshooting common alert issues. Preparing for PL-300 - Model the Data - Overview of PL-300 exam and key concepts - Practical exercises and scenarios for data modelling.
